Contaminated Sites and
Spill Response
Water Quality Monitoring
Hydrogeology Perspectives
on Lake Management
Valuing Ecosystem Services
Climate Change Impacts
First Nations Management
of Land and Water

PROPOSE A SESSION OF YOUR OWN!

Call for papers will
be available at
nalms.org
January 2016.

There may be no locale more appropriate to host a discussion on the impact of development on natural spaces than Banff National Park.

Established in 1885, Banff is Canada's first national park. Hosting millions of visitors annually, Banff exemplifies the need for a sustainable balance between economic development and conservation.

Symposium guests will enjoy the vast natural splendour of the region, and are invited to participate in a field tour, pub crawl and other conference events. Local amenities boast a wide range of recreational activities including the world-famous Banff Hot Springs and shopping in the picturesque townsite.
