12:05	Closing Remarks	Closing Remarks ALMS				
Lunch						

FIELD TOURS 13:00-16:00

Biological Nutrient Removal Facility: The original wastewater treatment plant in Lac la Biche consisted of mechanically aerated lagoons used to treat wastewater before discharge into Field Lake. The new biological nutrient removal plant was created to handle more stringent effluent quality limits on parameters including ammonia, total phosphorus, faecal coliforms, and turbidity. This new plant has the capacity to serve a population of

Sir Winston Churchill Provincial Park: This is Alberta's only Provincial Park comprised of islands. Connected to the mainland by a causeway in the East Basin, "Big Island", as it was originally called, boasts a 300 year-old forest and 72 campsites. The park is also recognized as an Important Birding Area. This section of the tour will be lead by Ashley Tkachyk of Alberta Environment and Parks.

Mission Historical Site: Established in 1853 (making it one of the oldest communities in Alberta) the Lac La Biche Mission is a beautiful national historical site located on the shores of picturesque Lac La Biche. This 45-acre site, including several historical buildings, antique and photo displays, interpretive center, and picnic area, offers visitors a link to the past through guided tours.
